### Notice of Opportunity to Comment on the Lover's Canyon Project

Dear reviewer:

The draft environmental assessment (EA) for the Lover's Canyon Project is now available for public review. The Lover's Canyon Project was developed to improve the stand structure of the project area, which would increase the resiliency of the landscape to ecological processes. The intent is that a more resilient landscape would improve protection for private property and resources from high-severity fire. The draft EA and proposal information are available on Klamath National Forest's project webpage at: <https://www.fs.usda.gov/project/?project=42352>.

This project is subject to comment pursuant to 36 CFR 218, Subparts A and B. The comment period for this EA will run for 30 days from the date the legal notice of the opportunity to comment is published in the Siskiyou Daily News. The anticipated date of publication is Thursday, November 30, 2017; however, published legal notice is the exclusive means for calculating the comment period. Only those who submit timely project-specific written comments during a public comment period are eligible to file an objection.
